Interactive Maths

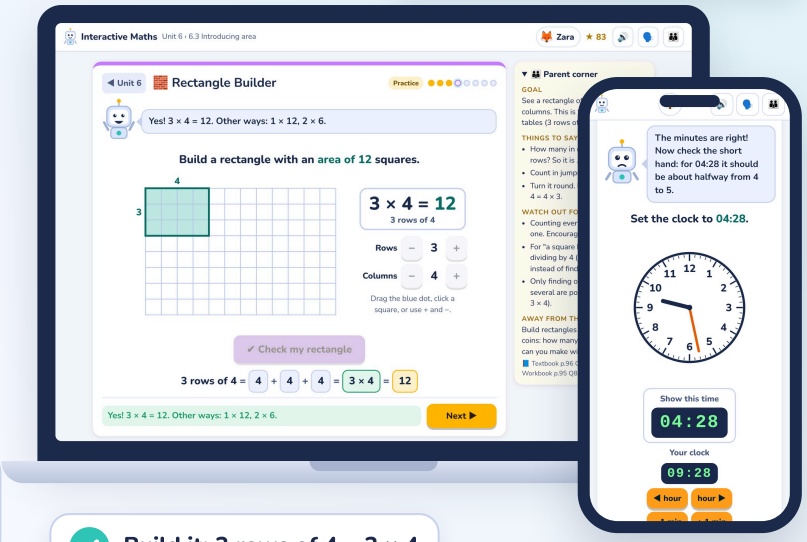

Grade 3 · Cambridge Primary Stage 3 curriculum

FOR PARENTS OF GRADE 3 CHILDREN

? A kind hint, not just “wrong”

Maths your child can build, move and master.

Hands-on activities that follow your child’s **Stage 3 maths book**, unit by unit. Sit together for just **15 minutes a day**.

17 units

105 activities

15 min a day

Build it: 3 rows of 4 = 3 × 4

How it helps your child

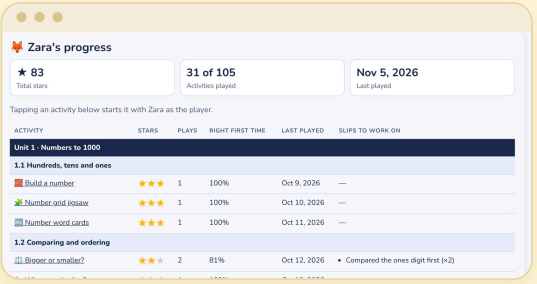

Hands-on, not just tick boxes
Your child drags, builds, measures, colours, sets clocks and sorts shapes.

Learn, practise, earn stars
Everyday objects first, then gradually harder questions. Up to 3 stars for answers right first time.

Kind hints, then “Show me”
Wrong answer? Bolt the robot gives a specific hint. After two tries, “Show me” shows the working.

Follows the school book
Same order as Learner’s Book 3 and Workbook 3 (2nd edition), with matching pages on every activity.

How it helps you

- **Parent corner** in every activity: the goal, things to say, mistakes to watch for and a task away from the screen.
- **Dashboard** of stars, right-first-time % and the slips to work on.
- **A profile for each child**: nickname, animal picture and their own stars.
- **No ads**, no tracking or profiling of children. Children never need an email.

Start in 3 steps

1. **Scan the code** or type the address on a laptop or tablet.
2. **Add your child** with a nickname and an animal picture.
3. **Sit together** for 15–20 minutes a day and collect stars.

SCAN TO START

Made by Ahmedullah’s Dad (Grade III-D)
Best on a laptop or tablet; works on phones too. An optional parent account (Google or email link) syncs progress across devices. Screens show a sample child.
